## SPECIFICATION SHEET

|                      |   |                               |
|----------------------|---|-------------------------------|
| Product Code:        | Zeta-Pak® Lenticular Filter Cartridge             |                               |
| Grade Designation:   | 12PFY7M70P16                                      |                               |
| Materials:           | Cellulose/Perlite                                 |                               |
| Wet Strength Resin:  | Non-Hazardous, listed as safe under 21CFR 176.170 |                               |
| Physical Properties: |   |                               |
|                      | Surface:  | Mottled                       |
|                      | Color:  | White to Off-White            |
|                      | Flowrate:   | 15 to 20 GPM per Pak® Average |
|                      | Retention:  | 0.5 micron nominal            |
|                      | Configuration:                                    | 16 Cells                      |
|                      | Filtration Area:                                  | 18.5 sq. ft.                  |
| Components:          |   |                               |
|                      | Gasket:   | Teflon                        |
|                      | Support Members:                                  | Polypropylene                 |

- \* Flowrate based on 70°F water flow through a 2 inch diameter filter at 10 PSI.
- \* Retention based on retaining 98% of a given micron particle.
- \* All components are listed in the CFR as generally recognized as safe for contact with food.

Note: Manufactured in accordance with ErtelAlsop Drug Master File located at the United States Food and Drug Administration Center for Drug Evaluation and Research
